DEPTHX LTD.

Portfolio Summary — full project details
5 November 2026

Multisensory AI-Powered Smart Vending System for Virtual Clothing Try-On | Hybrid Marketing

Science
Development: System Architecture / Pre-Prototype IP: Patent Pending
Commercial: Not Yet Offered Next milestone: Engineering Build Next
Summary: A multisensory, AI-powered smart vending system that lets shoppers virtually try on clothing .
Overview: AI-Powered Virtual Fashion Experience Overview DepthX is developing an AI-powered solution designed to offer a more personalised and engaging way to explore fashion products. Further information is available to interested individuals and organisations following an initial discussion and the signing of a Non-Disclosure Agreement (NDA).

Autonomous Aerial System | Hybrid Marketing Science

Development: System Architecture / Pre-Prototype IP: Patent Pending
Commercial: Not Yet Offered Next milestone: Engineering Build Next
Summary: An autonomous UAV-based advertising platform combining multi-sensor audience interaction with self-managed energy systems for continuous, adaptive outdoor campaigns.
Overview: DepthX is developing an innovative aerial advertising concept designed to support engaging and adaptable campaigns across a range of environments. The project is currently protected through filed intellectual property. Further information is available to interested individuals and organisations following an initial discussion and the signing of a Non-Disclosure Agreement (NDA).
